

## Emergency Use Authorisation- CloverMax (2,4-DB + MCPA)

- **CloverMax (PCS No 07333) has been approved for an Emergency Use Authorisation (EMUA) under Article 53 of regulation EC No 1107/2009 by the Pesticide Regulatory Control Division (PRCD) of the Department of Agriculture, Food and Marine (DAFFM)**
- This EMUA authorises the use of CloverMax for sale and use on farm as an “emergency” use within a 120 day period from 15<sup>th</sup> June 2024 to 15<sup>th</sup> October 2024 in newly sown re-seeds with **red clover silage swards** (at establishment) only
- All unused product must be returned to Nufarm Ltd. through your supplier before 30<sup>th</sup> November 2024
- The Pesticide Control Division (PCD) require information on the location and quantity of all stock entering the country as well as a list of any sales to distributors and any direct sales to growers
- The product may only be marketed in Ireland with the labels as approved by PCD

### CloverMax- Label Recommendations

- CloverMax is a soluble concentrate (SL) containing 240 g/l 2,4-DB + 40 g/l MCPA for the control of broadleaved and curled docks in newly sown re-seeds with **red clover silage swards (at establishment)** only
- **Application Timing: New Sown Red Clover Silage Swards; Apply after the 1<sup>st</sup> trifoliate leaf has appeared on the majority of the clovers and before the 4th leaf on majority of clovers, ensuring that weeds are at the susceptible stage**
- Maximum Application Rate: 7.0 L/ha, Maximum Total Dose: 7.0 L/ha in 100-400 litres of water per hectare in Tractor mounted/trailed sprayers only
- In hard water areas (>200 mg/L CaCO<sub>3</sub>) it is recommended to add a water softener
- Do not apply to established red clover crops.
