

## Kyleo takes out the broad leaf weeds not just the grass

Straight glyphosate products when used for destroying old grassland have a habit of leaving behind broad leaf weeds such as Docks and Thistle.

Kyleo with 2 4 D and the high tec surfactant system effectively destroys grass and the broad leaf weeds

## Kyleo superior control of thistles (*Cirsium arvense*)

Nufarm DE trial 2014

Kyleo 5.0 L/ha

## Kyleo superior control of docks (*Rumex sp.*)

### BENEFITS OF USING KYLEO FOR GRASSLAND DESTRUCTION

- GPS formulation provides enhanced uptake of active ingredients, 13% more glyphosate within 48 hrs than standards
- Rainfast within 1 hour
- Controls both grass and broad leaf weeds more effectively than standard glyphosate
- Re-planting intervals minimised - contact Nufarm for latest details

### FURTHER INFORMATION

Details of application rates and timings are given in Nufarm labels and product literature; both of which can be accessed from our website [www.nufarm.com/uk](http://www.nufarm.com/uk).

Alternatively, ring the Nufarm helpline on 01274 694714, Monday to Friday 9.00—17.00

Use plant protection products safely. Always read the label and product information before use.

For label and safety information, refer to the Nufarm website [www.nufarm.com/uk](http://www.nufarm.com/uk)
