

# ANSWER YOUR WEED CONTROL CHALLENGE.

When it comes to weed control, the best chance for success starts with the right solution. That's why we offer a full line of premium herbicide solutions – designed to meet your exact weed or growing condition challenge.

PREMIUM HERBICIDES	ADVANTAGES
<b>4-SPEED™ XT</b> 2,4-D triclopyr dicamba pyraflufen	<ul style="list-style-type: none"> <li>Increased speed of activity</li> <li>Increased control of difficult to control weeds</li> <li>Good activity when used in very early spring</li> <li>Labeled for use on golf course putting greens</li> </ul>
<b>ALLSTAR™</b> 2,4-D triclopyr quinclorac sulfentrazone	<ul style="list-style-type: none"> <li>Full load of 2,4-D results in more consistent perennial weed control</li> <li>Quinclorac targets crabgrass and increased control of broadleaf weeds</li> <li>Triclopyr provides lasting control on tough summer annual and perennial weeds</li> <li>Sulfentrazone for Nutsedge control</li> <li>4 actives for fast-acting, visible results within hours of the application</li> </ul>
<b>CELERO®</b> imazosulfuron	<ul style="list-style-type: none"> <li>Unparalleled control of sedges including false green kyllinga</li> <li>Best in class for kyllinga control</li> <li>Excellent safety on all turfgrass species</li> </ul>
<b>CERTAINTY®</b> sulfosulfuron	<ul style="list-style-type: none"> <li>Increased activity on many difficult to control weeds in warm-season turf</li> <li>Excellent control of sedges, tall fescue, annual bluegrass, and ryegrass</li> <li>Suppression of grassy weeds like dallisgrass and rescuegrass</li> </ul>
<b>CHANGE UP™</b> MCPA fluroxypyr dicamba	<ul style="list-style-type: none"> <li>Fluroxypyr provides increased activity on difficult to control weeds</li> <li>This formulation can be applied to sensitive warm-season species like St. Augustinegrass and centipedegrass</li> <li>Great tankmix partner with Manor for exemplary weed control in warm-season turf</li> </ul>
<b>COOL POWER®</b> MCPA triclopyr dicamba	<ul style="list-style-type: none"> <li>Ester formulation helps to increase movement of AIs into weeds – increased efficacy during low growth, cool seasons</li> <li>Triclopyr can increase activity on difficult to control weeds</li> <li>2,4-D-free herbicide for sensitive sites</li> </ul>
<b>ESCALADE® 2</b> 2,4-D fluroxypyr dicamba	<ul style="list-style-type: none"> <li>A consistent workhorse for a weed control program in both cool- and warm-season turf (excluding St. Augustinegrass and centipedegrass)</li> <li>Increased activity on difficult to control weeds with addition of fluroxypyr</li> </ul>
<b>HORSEPOWER®</b> MCPA triclopyr dicamba	<ul style="list-style-type: none"> <li>Amine formulation decreases potential for volatility and movement to sensitive plants during warmer temperatures</li> <li>Triclopyr can increase activity on difficult to control weeds</li> <li>2,4-D-free herbicide for sensitive sites</li> </ul>
<b>MANOR®</b> metsulfuron	<ul style="list-style-type: none"> <li>Increased activity on difficult to control weeds</li> <li>Provides control of broadleaf weeds and weedy grass in Kentucky bluegrass, fine fescue, Bermudagrass, and St. Augustinegrass</li> <li>Control ryegrass, bahiagrass, and foxtails</li> <li>Perfect tankmix partner with other broadleaf weed herbicides for use in fine fescue native areas</li> </ul>

PREMIUM HERBICIDES	ADVANTAGES
<b>MILLENNIUM ULTRA® 2</b> 2,4-D dicamba clopyralid	<ul style="list-style-type: none"> <li>Clopyralid provides increased activity of difficult to control weeds – specifically clovers and thistles</li> <li>Specifically for use on sod farms, golf courses, athletic fields, and other non-residential areas</li> </ul>
<b>PRIMETIME™*</b> 2,4-D fluroxypyr dicamba carfentrazone	<ul style="list-style-type: none"> <li>Excellent turfgrass tolerance</li> <li>Excellent weed control at suboptimal application timings throughout the growing season</li> <li>Visible broadleaf weed control within hours of application</li> <li>Consistent 60-day weed control period</li> <li>Goosegrass control and quick visual injury with Carfentrazone</li> </ul>
<b>Q-BALL™</b> quinclorac	<ul style="list-style-type: none"> <li>Excellent post-emergence control of crabgrass and other annual grasses like foxtail and barnyardgrass</li> <li>Great tankmix partner with other broadleaf weed herbicides to add broadleaf activity and crabgrass control at the same time</li> <li>Great safety on all cool-season turf species</li> </ul>
<b>QUINCEPT®</b> 2,4-D dicamba quinclorac	<ul style="list-style-type: none"> <li>Quinclorac adds broadleaf activity and crabgrass control</li> </ul>
<b>SOUTHPAW™</b> dicamba sulfosulfuron metsulfuron	<ul style="list-style-type: none"> <li>Outstanding turf tolerance in multiple warm-season turf species</li> <li>Broad spectrum control of sedge and kyllinga species with sulfosulfuron</li> <li>A single effective treatment for tough broadleaf weeds and grassy weeds, saving save time and labor on callbacks</li> <li>Two modes of action for weed resistance management</li> </ul>
<b>SURE POWER®</b> 2,4-D fluroxypyr triclopyr flumioxazin	<ul style="list-style-type: none"> <li>Flumioxazin provides faster visual response than of any of the PPO inhibitors</li> <li>Fluroxypyr and triclopyr provide increased activity on difficult to control weeds</li> <li>Flumioxazin helps to break down waxy cuticles of weeds to increase uptake of other AIs</li> <li>Provides excellent control of weeds even in the heat of the summer when weeds aren't growing as vigorously and cuticles are thickened</li> <li>Excellent choice for broad spectrum and quick control of mature weeds in golf course native areas</li> </ul>
<b>TRIPLET® LOW ODOR</b> 2,4-D TIPA MCPA dicamba	<ul style="list-style-type: none"> <li>Provides broad-spectrum control of broadleaf weeds with a low odor TIPA formulation of 2,4-D. Great for use in high-density housing areas, parks, etc.</li> </ul>
