## MANAGE TURFGRASS GROWTH, IMPROVE QUALITY AND APPEARANCE.

Anuew™ is a proven plant growth regulator, saving superintendents time while improving the overall playability of greens, tees and fairways. Labeled for application to common and hybrid Bermudagrass cultivars and Kikuyugrass. Anuew is a late-stage inhibitor with a novel mode of action that can be used on all managed turf areas to improve turfgrass quality, density and appearance.

### COMPETITIVE ADVANTAGES

- Improves plant physiology leading to plant health and stress tolerance
- Faster regulation in warm-season turf
- Improves appearance and playability on greens with bermudagrass mutations
- Protects Bermudagrass collars and surrounds from overregulation and weak or bare areas
- Supports seedhead suppression
- First EPA-approved label with Growing Degree Day (GDD) application modeling
